

Alarm module for IMA and IMAC series

ALARM MODULE

ALARM MODULE FOR IMA AND IMAC SERIES

Would you like to be notified in case of a technical failure so your customer does not get stuck in the cold?

We have an excellent solution for you in our programme.

The easy to install THERMOBILE Alarm module can alert a maximum of five mobile numbers. As soon as one of the inputs is activated in case of a power failure or malfunction, the THERMOBILE Alarm module sends a text message and/or a call to you or your employees so you can take action. You can use any providers SIM card. The THERMOBILE Alarm can operate one year on batteries. Low battery voltage is reported by a text message.
